COMPUTER SCIENCE UNDERGRADUATE PROGRAM
DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING
TEXAS A&M UNIVERSITY

CURRICULUM. The curriculum in computer science is designed to prepare students to enter into the rapidly expanding computer field. It is based upon the IEEE Computer Society and Association for Computing Machinery recommendations for curricula and courses. A major in computer science at Texas A&M University includes a 12-hour supporting field in another department of the University. This allows students to design a course of study that takes advantage of opportunities offered by other departments within the colleges of the University.

The four-year undergraduate curriculum in computer science includes a sound preparation in science, mathematics, English, statistics and computing. Students select three senior electives from twelve courses. The most popular are offered in multiple sections and semesters. Elective courses are available in the areas of: languages and compilers; software systems; computer systems and architecture; artificial intelligence and cognitive modeling; graphics and robotics; and computational science and engineering. Graduate courses in these areas may be taken by advanced undergraduates.

FACILITIES. The Department of Computer Science and Engineering has significant computer resources of its own, shares resources with other departments, and makes use of University systems. The department has 180 workstations available to students around the clock in instructional and open access laboratories and maintains numerous servers from Sun, Dell, and NetApp that are available to our students. All students have access to several web servers and the department's multiprocessor computational servers. These include three multiprocessor Sun servers running Solaris and a multiprocessor Linux server running Red Hat Enterprise. In addition, each student is allocated storage on the department's 10 TB file server. Wireless network access is provided throughout the department as is remote access via VPN.

UNIVERSITY AND AREA. Texas A&M University is located in the Bryan/College Station area (population estimated in 2010 to be 211,096; located 100 miles north of Houston. The Bryan/College Station area has been recognized as one of the leading growth areas in the nation. A growing industrial base, excellent housing, strong public school systems, and many recreational and entertainment activities characterize the area.

Texas A&M University, a land-grant, sea-grant, and space-grant university, was established in 1876 as the state's first public institution of higher education. The campus covers 5,142 acres and is within easy driving distance of the four largest cities in Texas. Enrollment is more than 48,000 students, and Texas A&M University has one of the largest enrollments in the nation in engineering, veterinary medicine as well as architecture and environmental design.

FINANCIAL AID. Presently, the Computer Science and Engineering Department’s scholarship funds are limited to returning undergraduates. The main application deadlines are in the Spring semester, although other opportunities may be announced. Additionally, there are many sources of support through the TAMU Financial Aid Office for students enrolled in Texas A&M University. Furthermore, university research projects often require the assistance of programmers, and many Computer Science students are hired to fill these jobs. The Computer Services Center hires some students as student operators, programmers, and analysts. Texas A&M University also has an active Co-operative Education Program with many openings for Computer Science students.
DEGREE PLAN INSTRUCTIONS FOR
COMPUTER SCIENCE MAJORS

2011-2012 Academic year

The instructions contained in this packet are to be used as a guide in preparing the Department of Computer Science and Engineering (CSCE) Degree Plan Form for the Bachelor's Degree in Computer Science (CPSC). After the student completes filling out the degree plan FROM the Web Page (http://www.cse.tamu.edu/academics/undergraduate), it is to be submitted to the Computer Science Undergraduate Advisor for approval. When the degree plan is approved by the Undergraduate Advisor, it will be returned to the student via an email message and a copy will be placed in the Computer Science Undergraduate Student's file in the Advising Office.

An upper division evaluation form needs to be submitted by the student and approved by the undergraduate advisor prior to enrollment in upper division computer science courses. Students enrolling in upper division courses who do not have a major designation of CPSC/CECN will be removed from the courses. Courses in the Department of Computer Science and Engineering (CSCE) at the 300 level or above are the designated upper level courses.

Degree audits are produced by the Registrar's Office and can be viewed on-line at myrecord.tamu.edu. The audits should be carefully reviewed by the student with his/her advisor, to determine the progress toward a degree.

Hours & Technical Electives

The total hours on the degree plan must be at least 128. Note that the 128 hours does not include the two International and Cultural Diversity courses. This is because these classes can be used to satisfy both the International and Cultural Diversity requirement and another requirement on the degree plan—see the advising office for a list of the courses that can be used in this way. This is the only place where one course can be used in two places on the degree plan. "Please note that the 128 total hours do not include a required foreign language. It is the student's responsibility to meet the University's foreign language requirement."

Comments and Observations

Before visiting the Undergraduate Advisor about a degree plan, the student should make as many decisions as possible. One problem area is transfer credits, in that it is sometimes difficult to know which courses may be used. Efforts are made to allow 'reasonable' substitutions. A student must submit a copy of his/her transcript evaluation along with the degree plan form if credit for transferred courses is desired. To approve courses that transfer "By Title" to TAMU documentation of the courses content, such as a catalog description, will be required.
It is the student's responsibility to have a degree plan meet minimum requirements. Everyone involved will check, but if a graduating senior's degree plan is not acceptable (e.g., only 127 hours), the student will not graduate.

**Computer Science Courses**

Thirty (30) hours are required and must be passed with a grade of at least “C” as follows: **CSCE 121-4, 181-1, 221-4, 222-3, 312-4, 313-4, 314-3, 315-3, 481-1, and 482-3. CSCE 411-3** is also required for all majors.

**Supporting Fields**

(A) Complete an official university recognized minor in an AREA APPROVED BY A CS ADVISOR. The student will be required to complete the courses mandated by the department offering the MINOR which will likely require 15+ credits to complete. **NOT ALL OFFICIAL MINORS** can be used to complete the supporting field requirement. At least 12 credits not otherwise used on the CPSC degree plan are required for completion of the supporting field.

-OR-

(B) Complete the 12 hour supporting area requirement on your degree plan. The CS ADVISOR MUST APPROVE THE SUBJECT AREA AND THE COURSES SELECTED. The minor must include 300 and 400 level courses and may be selected from the physical sciences, engineering, mathematics, business or liberal arts.

Note: An official minor (A) will be noted on your Transcript, the 12 hour supporting area (B) will not. Taking the first 12 credits of an official minor does not automatically satisfy the 12 hour requirement in (B).

The following are guidelines for satisfying the supporting area (B) for the most frequently selected departments:

**Math**

Complete the required MATH sequence shown on the degree plan with MATH 308 as the elective. Select one of the following: (MATH 304--MATH 311--MATH 222). Nine (9) hours to be selected from MATH 251 or (CSCE 442 or any 400 level MATH class (NO MATH 403, NO MATH 417 if choosing CSCE 442)).

**Business**

Only two options are available through the College of Business:

A. Classes towards the official Business minor. We do not require that the minor be completed but encourage students to do so as there are only one or two classes beyond those that can be used in the degree plan to take. The following classes from the minor will be used to fill the supporting area requirement: ACCT 209, FINC 409, MGMT 309 and MKTG 409. MGMT 209 can be used towards the “General Elective.”

B. Information Systems Classes (12 credits required).
NOTE: See handouts on the Business option. Pre-reqs listed and policy of needing forces for some INFO classes are the Info department's regulations and must be followed.

**Mathematics and Statistics**

Fourteen hours of Mathematics and three hours of Statistics are required. The courses listed inside the box must each be passed with a grade of at least "C". The elective mathematics course must be either MATH 304 or 308. The choice of a supporting area often dictates this elective.

NOTE: MATH 151 has a prerequisite of algebra, trigonometry and analytical geometry. If MATH 150, 102, 103, or 104 are taken to meet these requirements, they may not be used for credit on the degree plan's requirement of 130 hours.

**Science Courses**

16 hours of science coursework are required; choose from any two of the following four options. Only ONE option B may be used to satisfy this requirement.

1. Chemistry: CHEM 101/111 and 102/112
2. Physics: PHYS 218 and 208
3. Life Sciences:
   i. Option A: BIOL 111 and BIOL 112
   ii. Option B: any two of: BIOL 111, BIOL 101, BIOL 107
4. Earth Sciences:
   i. Option A: GEOL 101 and GEOL 106
   ii. Option B: any two of: GEOG 203, ATMO 201/202, RENR 205/215

Computer Science Upper-Level Track System (See Classes & Rules pg 2)

**General Elective Course**

Three (3) hours of general electives are required and should be chosen from the approved list from the Academic Advisors.
DIRECTED ELECTIVES

Humanities Elective Course

ENGR 482 (PHIL 482) is a required course. (You must take a writing intensive section of this class.)

Visual and Performing Arts

Three (3) hours of visual and performing arts electives must be selected from the list of College of Engineering directed electives for visual and performing arts - please refer to Page 18 of the undergraduate catalog.

Social Science Elective Course

Three (3) hours of social science electives are required which must be selected from the list of College of Engineering directed electives for social science courses - please refer to Page 18 of the undergraduate catalog.

Cultural and International Diversity Courses:

Six hours (two courses) of cultural and international diversity are required. The list of courses that satisfy this requirement can be found on page 19 of the catalog. There are some courses on this list that also satisfy the social science (eg. Engl 251) or visual and perf. Arts (eg. Arts 150) requirements. If you select such courses you may satisfy two requirements with a single course. The total of 128 hours for this degree is based on the assumption that students will choose courses that satisfy two requirements to avoid the additional six hours of course work.

CITIZENSHIP

History Courses

Six (6) hours of American history are required of which three hours may be in Texas history and three semester hours in American history, or the entire six hours may be in American history. Students in ROTC may substitute 6-hours of advanced military science courses for 3-hours of American history.

Political Science Courses

Six (6) credit hours of political science are required which should include POLS 206-3 and 207-3. Students in ROTC may substitute 6-hours of advanced military science courses for POLS 207.
Physical Education Courses

Two (2) hours of KINE courses are required. One (1) hour of KINE 198 -- Health and Fitness (these courses may be taken pass/fail or for a grade); and one (1) hour of KINE 199 -- Activity (these courses must be taken pass/fail).

English, Speech and Writing Courses

Six (6) hours of English, Speech and Writing courses are required which includes ENGL 104-3 and one of ENGL 210-3, 301-3, COMM 203-3, or 205-3. Students transferring into the program having already taken other English courses may be allowed to use them as approved by the Undergraduate Advisor. Texas A&M University no longer teaches ENGL 201, but credit for this class can be obtained from other institutions (ENGL 2311), so it remains on the approved list. English 104 must be passed with a grade of at least "C".

Foreign Language Requirement

Proficiency in a foreign language is also required to graduate from Texas A&M University. This requirement can be met by:

- Completing two units (two full years) of high school course work in the same foreign language.
- Completing two semesters (one full year) of course work at the college level in the same foreign language, or
- Demonstrating proficiency in a foreign language by examination. See catalog for additional requirements under graduation requirements and Foreign Language.
