Non-MEEN Technical Electives described on next page (backside)
NON-MEEN Technical Electives (no more than 6 hours)

Students may take non-MEEN courses, either within or outside the College of Engineering, to satisfy technical elective requirements. All non-MEEN technical electives must be approved by the Undergraduate Advising Office, using the following set of criteria: 1. Course has a discipline-specific prerequisite, 2. Course content requires advanced math skills (i.e., Math 251), 3. Course uses formal analytical methods and requires quantitative coursework, and 4. Course material provides a deep understanding in a specific technical discipline.

Based on previous practice, the following courses are pre-approved as non-MEEN technical electives:

- **Energy Engineering Certificate**: 300 or 400-level engineering courses: http://engineering.tamu.edu/academics/certificates/energy
- **Eng. Proj. Mgmt Cert.**: 300 or 400-level eng. courses: http://engineering.tamu.edu/academics/certificates/engineering-project-management
- **Polymer Specialty Cert**: 300 or 400-level engineering or science courses: http://engineering.tamu.edu/academics/certificates/polymer
- **Safety Engineering Specialty Cert**: 300 or 400-level engineering courses: http://engineering.tamu.edu/academics/certificates/safety
- **ENGR 410 only when coupled with International Certificate**: http://engineering.tamu.edu/international/certificate
- **Architecture**: ARCH 619 (N.B., requires graduate credit approval form; see advisor for details).
