Using Citrix On a Personal Windows Computer

Setup

1. Install Texas A&M's VPN at connect.tamu.edu — You must be connected to the VPN to run Citrix while off campus
   a. Follow the instructions on this page to set up the VPN client

2. Install or update the Citrix Receiver application from www.citrix.com and select Downloads at the top of the page
3. Select **Citrix Receiver** from the drop-down menu

4. Click the **Download Receiver for Windows** button
5. Click **Save File** if your web browser asks if you would like to allow the download.

6. After the download is complete, open **CitrixReceiver.exe** from your **Downloads** Folder to install the application.

7. Click **Yes** to allow the Citrix Installer.
8. Follow the prompts to install the **Citrix Receiver** application.
Using the Citrix Application

1. Open the **Citrix Receiver** application by double-clicking the Citrix icon from the right side of your computer’s taskbar

2. Login with your **NetID** username and password

3. The **Citrix Receiver** window will open, where you can access any of the Citrix storefront apps
Exiting the Citrix Application

1. Sign out by clicking on the arrow next to your account at the top-right of the Citrix Receiver window and selecting Log Off
