

Assembly Trainer

Team 5: Nathaniel Adkins, Nick Guinta,
Jeremy Laughlin, Kelly Luk

Project Deliverables:

- Code execution environment
- Graphical and Command line display
- Examples, Tutorials and Documentation

Problem Statement: Learning assembly is no longer required, but should be. Assembly helps improve knowledge about how high level software is translated into machine code. Reverse engineering and security jobs often require detailed assembly knowledge. Our Goal is to make learning the concepts behind assembly straightforward and fun.
