Reciprocal Exchange Program Guidelines
Undergraduate Study Abroad
Industrial and Systems Engineering Department

Early planning is key to a successful REEP experience. Consult with your academic advisor the semester before you initiate the REEP process.

What is the process to request for approval?

- Follow Study Abroad Office guidelines (forms, deadlines, etc.).
- Provide ISEN department with syllabus of both the host university’s course and TAMU’s, and make a strong written case for the course to be considered equivalent.
- If taking non-ISEN courses, student must visit the respective departments that offer the courses and obtain signatures.

ISEN advisors will only approve ISEN courses.

What courses would be appropriate to take under REEP for INEN?

- Must meet prerequisites for courses both abroad and at TAMU.
- ISEN technical electives will only be approved for students in junior and senior-level ISEN courses.
- ISEN required courses may not be taken as part of REEP.
- Courses critical for an ISEN degree such as STAT 211 & CSCE 206/110/111/121 are not recommended to take abroad.

See below for sample semesters with courses highly recommended for a REEP experience.
